## WORKSHOP OUTLINE

### dominKnow Flow

#### Introduction & Objectives

---

This modular Workshop combines online and classroom learning providing delegates with a comprehensive understanding of the functionality of dominKnow Flow. Depending on job role and previous experience, some delegates may opt to attend just one or a selection of the modules. The knowledge transferred is consolidated via hands-on, real life scenarios whilst following good instructional design and content development best practice throughout.

During the initial module, which is undertaken remotely and facilitated by an experienced Instructor, delegates learn the features and functions of dominKnow Flow. This rudimentary knowledge is assessed prior to commencement of the subsequent modules, which are usually delivered as Instructor Led Workshops. Each delegate also receives 3.5 hours post-course telephone support and mentoring as part of the package.

#### Prerequisites

---

Module	Prerequisite	Suggested Modules (if prerequisite not met)
1	None	
2	Experience of authoring content in Flow	Module 1
3	Experience of authoring content in Flow	Modules 1 and 2
4	Experience of authoring in Flow	Modules 1, 2 and 3
5	Experience of authoring in Flow and managing a development team	Modules 1, 2, 3 and 4
6	Understanding of authoring in Flow and how to administer users and courses within Flow	Modules 1, 2, 3, 4 and 5

#### Course Outline

---

This course is delivered as six distinct modules:

- **Module One: Basic Functionality of Flow** (15 hours eLearning)  
This module will introduce the key functionality that a Flow Author uses for content development. Delegates will gain hands-on experience whilst working through the eLearning content at their own pace. During this training, delegate understanding is assessed to ensure a basic level of knowledge around Flow functionality has been reached.
- **Module Two: Consolidation of Key Authoring Skills** (1 day classroom)  
This module is designed to consolidate the skills learned in module 1. With the aid of the Instructor, delegates will rebuild one of the sample courses that ship with Flow.

# LARMERBROWN

- **Module Three: Creation of Bespoke Content** (1 day classroom)  
In this module delegates will apply the knowledge gained in the earlier modules, or their practical experience, to design and build a fully functioning course using dominKnow Flow. If required delegates can bring their own eLearning assignment to this lesson.
- **Module Four: dominKnow Flow User and Course Management** (1/2 day classroom)  
In this module delegates will look at how best to manage users and courses within Flow to ensure that course development is streamlined and standardized across their organization.
- **Module Five: Introduction to Design Standards and Development Considerations** (1/2 day classroom)  
In this module delegates will focus on Flow functionality that can help to standardize course design and development with the use of pre-built or bespoke course Themes and page Templates.
- **Module Six: Development Methodology** (1 day classroom)  
In this module delegates will formalize what was covered in Modules Four and Five to create their own bespoke development methodology.

## Module One Lessons – Basic Functionality of Flow

---

- Getting Started
- Working with Text
- Working with Media
- Working with Components
- Refining Page Behaviour
- Working with Custom Actions
- Working with Learning Objects and Test Questions
- Reviewing a Course
- Publishing
- Assessment (Practise pages)

## Module Two Lessons – Consolidation of Key Authoring Skills

---

- Hands on experience of rebuilding a pre-designed course

## Module Three Lessons – Creation of Bespoke Content

---

- Storyboard / Wireframe your content
- Prototype your content
- Build your content

## Module Four Lessons – dominKnow Flow User and Content Management

---

- User Management
- Course Management
- Media Library Management
- Publishing Options

## Module Five Lessons – Design Standards and Considerations

---

- System Themes
- Bespoke Themes
- Using Out-of-the-box page Templates
- Create bespoke page Templates

## Module Six – Development Methodology

---

- Create your bespoke development methodology
- Begin to create your Themes
- Begin to create your Templates
- Organise your Author teams within Flow
- Organise your Reviewer teams within Flow
- Build your course Lifecycle
