- Content Migration

Overview

This course seeks to provide delegates with an understanding, supported by hands on experience, of the web-based administrative functionality offered by the CA PA Manager. A key focus during this course is the creation of an efficient multi-developer collaborative development environment. CA PA functionality such as security, managing roles and permissions as well as workflows, ensure that development outputs are both professional and time efficient.

Additional functionality includes the Desktop Assistant, the Web Assistant (when applicable) and the recommended procedure to ensure the successful migration of content.

Course facilitators are qualified Trainers with extensive content development experience. This experience ensures that delegates receive 'value add' throughout the course, drawn from real-life project experience.

All delegates receive telephone support for one month post-course. Telephone support is limited to the features and functions detailed within the Course Lesson Plan.

Objectives

The exact objectives of this course are dependent on the learning requirements of the delegate(s). The content within this course outline provides a summary of all the advanced administration features within CA PA 13. This course also provides a good introduction to administrators who do not know CA PA from a development perspective.
