

dominKnow | ONE

A Complete eLearning Authoring Toolset

dominKnow | ONE offers a complete authoring toolset that is easy to use and powerful for advanced users, with no programming required.

- Powerful Components
- Learner Initiated Events
- Interactive Scenarios
- Personalised Experiences
- Design Options
- User Input and Progress

dominKnow | ONE offers all the features of an eLearning Authoring System together in one solution, allowing your Content Authors to work collaboratively to rapidly create engaging learning content.

Authoring – Responsive or Adaptive

With dominKnow | ONE you can create multiple types of learning content for use on any device. Bringing together traditional eLearning course development with powerful responsive authoring and built-in software simulation means that you need fewer tools to build more kinds of eLearning, faster. Templates, stock assets, a central library to share and re-use content across projects and real-time collaboration and review provide all the capabilities you need for rapid authoring.

The Flow mode within dominKnow | ONE enables you to create multiple types of responsive content without sacrificing functionality and user experience. Automatically adapting content to every device, Flow creates truly responsive content, so you only need to author once for all devices. If your content doesn't need to be responsive, the Claro mode allows you to create traditional HTML5-based eLearning courses which will still adapt and scale to fit any size screen.

Pre-created themes, templates and layouts allow you to easily get started and quickly create engaging and visually appealing content. There is also a library of pre-loaded stock photos, characters, icons and shapes to choose from. You can quickly and easily convert existing PowerPoint files into engaging eLearning courses and import Word files, including images.

dominKnow | ONE

Fully customisable practise and test questions allow you to check for understanding in your eLearning courses. Multiple question types are available which can also be randomised using question banks.

Your content can also incorporate audio narration, music, animations and interactive video, as well as images.

Software Simulation

dominKnow | ONE comes integrated with a powerful and responsive simulator app that allows you to easily incorporate software simulations, screen captures and animated GIFs into your eLearning courses. You can edit the recorded Capture steps and add audio. Simply drag and drop your completed Capture recording onto your content page and set it to behave as an animated “Show Me”, an interactive “Try Me” or a list of guided steps.

Collaboration and Content Management

dominKnow | ONE includes built-in collaborative workflow and review tools allowing you to manage, track and report on your eLearning projects. All team members can work simultaneously on the same project with functionality that allows you to see version history, who has made changes, as well as review and provide feedback.

A central media library stores and tracks all your assets in one location so any team member can share, re-purpose or re-use content.

The roll back feature in dominKnow | ONE allows you to revert to an earlier version of your content if needed. With everything automatically saved to the cloud, there is no worry about losing your content.

Themes can be utilised to maintain brand consistency, ensure your authors use up-to-date content and allow you to update the appearance of multiple courses in one simple step.

Author Once, for All Devices

Collaborate in Real Time

Engage Reviewers, Anywhere

Share and Re-Use Resources

dominKnow | ONE

Publishing

Publish your eLearning as SCORM, xAPI, AICC, Web or Print and use PENS for one-click uploading into your Learning Management System.

dominKnow | ONE is the only authoring system that automatically generates xAPI statements for almost any action your learners take. This enables you to easily leverage better data from a wider range of learner experiences. Connect to one or more Learning Record Stores (LRS) in a few simple steps.

Accessibility

dominKnow | ONE meets guidelines for WAI-ARIA, WCAG AA Level 2.0 and Section 508 Compliance, ensuring that you can author eLearning that is accessible to everyone. This includes elements such as text and focus, audio or video transcripts, closed captioning, language ID for screen readers and WCAG compliant themes.

Translation and Localisation

dominKnow | ONE simplifies the process of translating your eLearning courses, in three easy steps:

1. Clone any course and choose from over 50 pre-loaded languages that automatically update system text and course interface for things like tool tips and navigation.
2. Export text as an XML or Excel file for any common translation system.
3. Import translated text back into your cloned course.

You can preview the 'parent' course whilst working in your translated version and see all versions of a translated course when browsing your courses. Your content remains linked to the parent course for simple future updates across all versions.

Benefits of dominKnow | ONE

- Author Once for All Devices
- Create Multiple Types of Learning Content
- Rapid Authoring with Pre-Created Templates
- Advanced Authoring with Powerful Pre-Built Components
- Collaborate and Review in Real Time
- Share and Re-Use Resources
- Quickly Convert Existing PowerPoint and Import Word Content
- Extensive Media Library including Characters, Icons and Images
- Leverage Learner Data using xAPI

About Larmer Brown

Larmer Brown has provided change management and learning solutions to corporate clients since 1984. Our primary objective is to help organisations with the implementation of learning initiatives through content development and training delivery programmes.

We are a Reseller and Services Partner for dominKnow Learning Systems offering the award-winning dominKnow | ONE to support our clients' learning initiatives.
