Email: sales@larmerbrown.com

This workshop provides delegates with knowledge and understanding of the administration and security functions of the Larmer Brown Platform.

Overview

This course seeks to provide delegates with an understanding, supported by hands on experience, of the administrative functionality offered by the Manager. A key focus of the workshop is the creation of an efficient multi-developer collaborative development environment. Functionality such as security, managing roles and permissions as well as workflows, ensure that development outputs are both professional and time efficient.

Course facilitators are qualified Trainers with extensive content development experience. This experience ensures that delegates receive 'value add' throughout the course, drawn from real-life project experience. All delegates receive telephone support for one month post-course. Telephone support is limited to the features and functions detailed within the Course Lesson Plan.

Objectives

The exact objectives of this workshop are dependent on the learning requirements of the delegate(s) and the outcome of a Discovery session, if relevant. The content within this outline provides a summary of all the advanced administration features and supplements the completion of the Standard and Master Author courses.

About Larmer Brown

Larmer Brown has been delivering learning solutions to corporate clients since 1984. Our services have evolved in order to deliver a portfolio of offerings to support clients through each phase of their learning project, system implementation or upgrade.
