

Learn From Anywhere with the dominKnow eLearning Mobile App

dominKnow's mobile player provides you with an integrated way to deliver training content to your learners wherever and whenever they want it - without the need for continuous internet connectivity.

The dominKnow Mobile App gives you the power to deliver any mobile-ready learning content online or offline, on iOS and Android devices.

With the app, you can launch SCORM and xAPI content built with the award winning dominKnow | ONE that always produces mobile ready content. Content can be consumed both online and offline with full tracking and recording of your data to your device.

If you want to connect to your LMS, the dominKnow player can be branded and integrated with your LMS through the open API. This means that all your mobile ready content (whether created in dominKnow | ONE or another content authoring tool) can be tracked offline, with the results sent back to your LMS when the learner has reconnected to the internet.

Create content with any authoring tool that can produce mobile-ready content and use the dominKnow mobile app with your LMS or LRS as a standalone mobile solution that supports SCORM 1.2, 2004 and xAPI.

Publish Any Content

Create content from different sources, including dominKnow | ONE, or any other mobile-ready authoring tool, Word documents, PDFs, PowerPoints and more.

Integrate With Your LMS/LRS

Use the open API to integrate directly with your LMS or LRS.

Offline Accessibility

Download content for use offline and once internet connection is re-established, results are sent back to your LMS.

Responsive App

The dominKnow Mobile iOS and Android App is responsive and will adjust to any device size.

Make It Your Own

Take the dominKnow mobile app and brand it for your own organisational needs. You get full control of what content your users see and when.

Keep Content Secure

Delete content remotely and set the app to auto timeout when not in use, forcing the learner to login.

Customisable

Organise content into unique categories, create a unique URL, specify your own course and category icons, and include personal learner information.

Send Push Notifications

Use "One Signal" to send learners notifications of updates, changes to content, or any learning related information.

Tracking

Tracking information includes course status, score, time in the course and even full test question details when using SCORM 2004.

About dominKnow | ONE

dominKnow | ONE offers all the features of an eLearning Authoring System together in one solution, allowing your Content Authors to work collaboratively to rapidly create engaging learning content.

With dominKnow | ONE you can create multiple types of learning content for use on any device. Bringing together traditional eLearning course development with powerful responsive authoring and built-in software simulation means that you need fewer tools to build more kinds of eLearning, faster. Templates, stock assets, a central library to share and re-use content across projects and real-time collaboration and review provide all the capabilities you need for rapid authoring.

About Larmer Brown

Larmer Brown has provided change management and learning solutions to corporate clients since 1984. Our primary objective is to help organisations with the implementation of learning initiatives through content development and training delivery programmes.

We are a Reseller and Services Partner for dominKnow Learning Systems offering the award-winning dominKnow | ONE to support our clients' learning initiatives.

Our services and support ensure that your content authoring team achieves maximum benefit from dominKnow | ONE. This includes consultancy, training, content development services, implementation and technical support, as well as a Discovery Workshop which gets you up and running fast.
