

dominKnow|ONE

Author Once And For All

A Complete eLearning Authoring Toolset

dominKnow | ONE offers a complete authoring toolset that is easy to use and powerful for advanced users, with no programming required.

- Responsive Authoring
- Built-in Software Simulation
- Central Library Loaded with Assets
- Real-time Collaboration
- Publish to Multiple Formats
- Mobile App

dominKnow | ONE is a powerful cloud-based authoring platform with integrated authoring tools and built-in simulation, working together as one. This enables your Content Authors to work collaboratively to easily create, share and reuse engaging content faster, by managing assets centrally.

Two Powerful Authoring Modes

With dominKnow | ONE you can quickly create multiple types of learning content for use on any device. Bringing together traditional eLearning course development with powerful responsive authoring and built-in software simulation means that you need fewer tools to build more kinds of eLearning, faster.

The Flow mode within dominKnow | ONE enables you to create multiple types of responsive content without sacrificing functionality and user experience. Automatically adapting content to every device, Flow creates truly responsive content, so you only need to author once for all devices. If your content doesn't need to be responsive, the Claro mode allows you to create traditional HTML5-based eLearning courses which will still adapt and scale to fit any size screen.

Pre-created themes, templates, layouts and stock assets enable you to easily get started, with powerful components actions and triggers that allow you to quickly create engaging and interactive learning scenarios. You can quickly and easily convert existing PowerPoint files into engaging eLearning courses and import Word files, including images. There is also a central library to share and re-use content across projects, and real-time collaboration and review provide all the capabilities you need for rapid authoring.

Fully customisable practise and test questions allow you to check for understanding in your eLearning courses. Multiple question types are available which can also be randomised using question banks.

Your content can also incorporate audio narration, music, animations and interactive video.

Software Simulation

dominKnow | ONE comes integrated with a powerful and responsive simulator app for Windows and Mac users. Capture allows you to easily incorporate software simulations, screen captures and animated GIFs into your eLearning courses. You can edit the recorded Capture steps and add audio. Simply drag and drop your completed Capture recording onto your content page and set it to behave as an interactive step-by-step video or a list of guided steps.

Collaboration and Content Management

dominKnow | ONE includes built-in collaborative workflow and review features allowing you to track your eLearning projects for improved management and progress measurement. All team members can work simultaneously on the same project with functionality that allows you to see version history, who has made changes, as well as review and provide feedback.

Themes can be utilised to maintain brand consistency and enable you to update the appearance of multiple courses in one simple step. A central media library stores and tracks all your assets so any team member can share, re-purpose or re-use content easily.

The roll back feature allows you to revert to an earlier version of your content if needed and with everything automatically saved to the cloud, there is no worry about losing your content.

Hosting

Larmer Brown exclusively offers single tenancy, security approved UK hosting for dominKnow | ONE. Our hosting solution is fully managed, providing dedicated, cutting-edge security from an ISO-accredited UK data centre. For our government and public sector clients, our hosting service has also achieved Cyber Essentials Plus certification and is available on the G-Cloud 12 framework. This ensures the very highest standards of security, business continuity and peace of mind for all of our clients.

Publishing

Publish your eLearning as SCORM, xAPI, AICC, Web or Print and use PENS for one-click uploading into your Learning Management System.

dominKnow | ONE is the only authoring system that automatically generates xAPI statements for almost any action your learners take. This enables you to easily leverage better data from a wider range of learner experiences. Connect to one or more Learning Record Stores (LRS) in a few simple steps.

Streamline publishing and distribution with the use of Convey, an optional hosting solution that sits between dominKnow | ONE and your LMS, ensuring your learners have access to the most up-to-date content in the format they need it.

Learning Deployment

dominKnow | ONE offers you the flexibility to distribute any type of learning, anywhere your learners need it on any device, including:

- **Performance Support / Job Aids** - Publish parts of an eLearning course as a web page, knowledge base or infographic to provide learners additional support on the job.
- **Resource Documents** - Create PDFs, quick-start guides or other printable resources to support classroom training and on-the-job initiatives.
- **Mobile Player** - Publish to the dominKnow mobile app to create a library of courses that learners can access from anywhere online or offline, with full tracking and recording of learner data to their device.

The dominKnow Mobile Player can be branded and integrated with your LMS so all your mobile ready content (whether created in dominKnow | ONE or another tool) can be tracked offline and results sent back to your LMS when the learner has reconnected to the internet.

Accessibility

dominKnow | ONE supports Section 508, WCAG 2 Level AA and WAI-ARIA compliance, ensuring that your eLearning content is accessible and compliant.

Translation and Localisation

dominKnow | ONE simplifies the process of translating your eLearning courses, in three easy steps. You can clone any course and choose from over 50 pre-loaded languages that automatically update system text and course interface for things like tool tips and navigation.

Your translated course content remains linked to the parent course for simple future updates across all versions.

Benefits of dominKnow | ONE

- Author Once for All Devices
- Create Multiple Types of Learning Content
- Rapid Authoring with Pre-Created Templates
- Advanced Authoring with Powerful Pre-Built Components
- Collaborate and Review in Real Time
- Share and Re-Use Resources
