

LARMERBROWN

Learning Management for the Modern Digital Workplace

Create Courses

Administrators can create courses easily and make them available immediately in your course catalogue. Features include:

- Course creator
- Course catalogue
- Configurable course registration and enrolment
- End to end course automation

Deliver Content

Learners can access content anytime, anywhere and complete training when they want. Features include:

- SCORM Player
- Assignment
- Gradebook
- Learning path that supports multiple content types
- Quiz engine with different question types

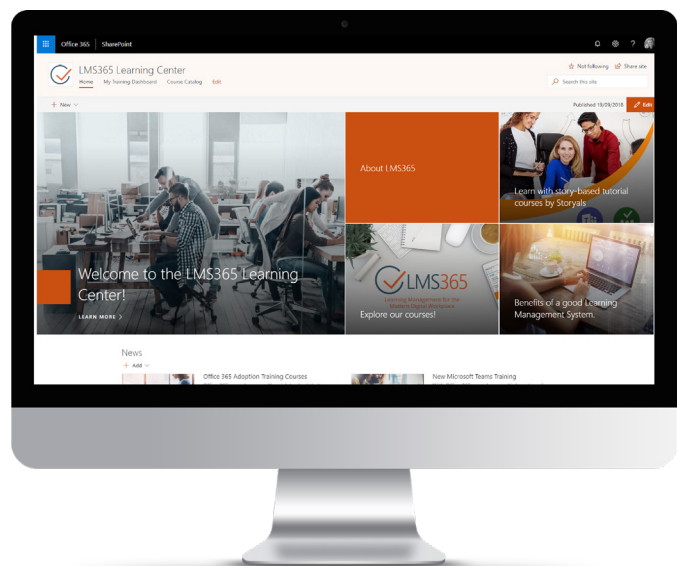

Track and Manage

Learners and Managers can log into their account to follow training progress instantly. Features include:

- Overall administration
- Track all training
- Reporting
- Certificates
- Learner Dashboard for instant, personalised training overview

LMS365 unites leading-edge learning management technology with Microsoft 365 to make learning part of your daily business process.

With LMS365 you can train your distributed workforce using a single, unified platform your business already knows how to use. Leveraging your existing Microsoft 365, SharePoint or Teams environment, you can deliver state-of-the-art learning and training through a familiar environment, supported by cutting edge technology.

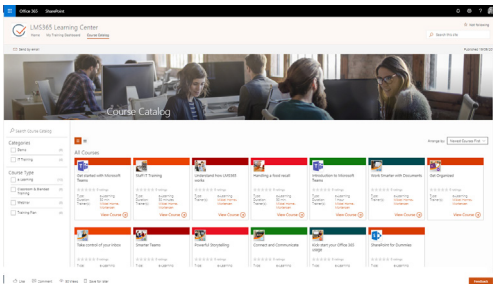

- Seamlessly integrated
- Easy to use
- Fast to deploy
- Highly customisable
- Collaborate with Microsoft Teams integration

LMS365 provides a suite of learning features that are added directly into your existing Microsoft 365, SharePoint or Teams platform, including:

Course Creator and Catalogue

The LMS365 Course Creator turns SharePoint sites and content into formalised, enrolled courses that make the most of Microsoft 365's collaborative features.

The Course Catalogue provides learners with an efficient and dynamic way to find relevant learning that suits their needs. Display a list of all courses or allow learners to search by category. Identify required courses and due dates. Show learners which courses they're already taking. Learners can enrol or unenroll from a course in one click.

Learning Module Builder

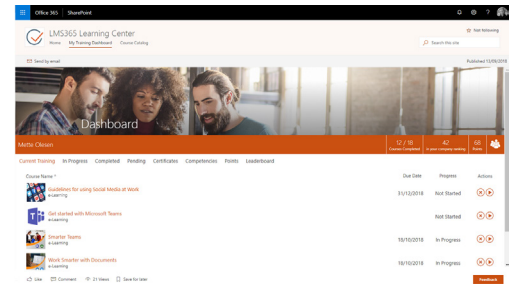

The LMS365 Learning Module Builder lets you combine quizzes, SCORM training and any SharePoint or web content into a pre-defined learning module with sequenced learning steps. Learners can move to the next step only after they've completed the last.

Themes can be utilised to maintain brand consistency, ensure your authors use up-to-date content and allow you to update the appearance of multiple courses in one simple step.

Quiz Builder

Use the LMS365 Quiz Builder to create attractive, easy-to-use quizzes that enable learners to test and demonstrate their knowledge. Place each quiz on its own dedicated 'home' page, embed it next to relevant content on any SharePoint page, or include it in any LMS365 course. Different question types are available.

Learners can view personal progress from their Training Dashboard, where rewards and leader boards provide further motivation to learn and gain the recognition they deserve.

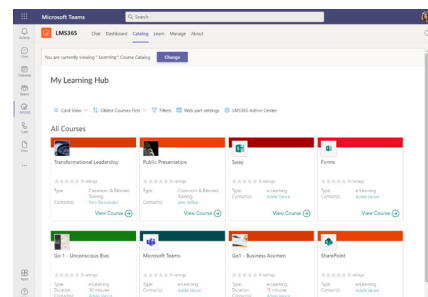

Reporting

LMS365's Administration and Reporting feature allows you to configure, control and track learner progress. Export to Excel or use Power BI to create stunning reports in just a few clicks.

Learner Collaboration

Leverage Microsoft Teams for training, opening up a whole new level of social collaboration. The chat-based interface of Microsoft Teams allows your workforce to work together on the various course topics in a fun and informal manner. The LMS365 Teams Bot will help your learners locate their training and courses.

SCORM Player and Mobile App

The LMS365 Mobile App for iOS, Android and Windows provides learners with access to a personalised experience from their mobile devices, including the ability to take SCORM content offline.

Course and Content Management

Why LMS 365?

LMS365 helps your organisation realise its full potential faster

- Engage learners within their daily working environment
- Get up and running in minutes with a familiar user interface – no need to train learners
- Scale to meet the needs of any size distributed workforce
- Enable employees to help each other become more productive
- Take advantage of your existing Microsoft 365-based business process
- Eliminate the need to install, integrate and manage third party web services
- Deploy formalised courses or just-in-time, context-sensitive training anywhere in the business process
- Use existing Microsoft competencies to customise the learning experience and meet branding requirements

About Larmer Brown

Larmer Brown has provided change management and learning solutions to corporate clients since 1984. Our primary objective is to help organisations with the implementation of learning initiatives through content development and training delivery programmes.

We are a Reseller and Services Partner for LMS365 offering specific expertise and support around implementation for Learning and Development initiatives. Our tailored services ensure that your organisation achieves maximum benefit from your LMS365 implementation. This includes consultancy, training, implementation and technical support.
